

Supplementary JSNA Bulletin ... September 2016

[Exploring the impact of early life factors on inequalities in risk of overweight in UK children](#): findings from the UK Millennium Cohort Study

Overweight and obesity in childhood are socially patterned, with higher prevalence in more disadvantaged populations, but it is unclear to what extent early life factors attenuate the social inequalities found in childhood overweight/obesity. Study [here](#)

[Teenage parent outcomes modelling tool](#)

This tool brings together data and evidence about factors that affect outcomes for teenage parents and their babies and children. The tool is for use by teenage pregnancy leads in local authorities and information analysts to help the planning and commissioning of effective local services. The tool presents data about conceptions and births for each local authority and makes comparisons with the region, England and statistical neighbours. Access tool [here](#)

[Not seen and not heard](#) (July 2016)

A review of the arrangements for child safeguarding and health care for looked after children in England

[The Best start in life knowledge hub](#) brings together information and evidence to help commissioners, providers and professionals in commissioning for better outcomes during pregnancy and in the early years. You can view overarching resources about commissioning services for children aged 0 to 5 and making the case for investment in this area in the [early years health and wellbeing overview](#) section

[Statistics on alcohol, England, 2016](#)

This statistical report presents a range of information on alcohol use and misuse drawn together from a variety of sources. The report aims to present a broad picture of health issues relating to alcohol use and misuse in England and covers topics such as drinking habits and behaviours among adults (aged 16 and over) and school children (aged 11 to 15). Access report [here](#)

[A guide for commissioners of child health services on preventing unintentional injuries among the under-fives](#)

This guide presents a series of evidence-based statements for commissioners of services that derive from the Keeping Children Safe at Home (KCS) project, a research programme at the University of Nottingham that ran from 2009-2014. It is intended to assist commissioners to specify local programmes that are effective in reducing unintentional injuries to pre-school-aged children. Access [here](#)

[Briefing: Review of data security, consent and opt-outs in health and social care](#)

[Girls less confident as they grow older, says Girlguiding](#)

A poll of 1,627 girls and young women showed they felt less powerful as they progressed through secondary school. Access [here](#)
