

Wirral Joint Strategic Needs Assessment Bulletin

November 2015

[Not displaying properly? Access this bulletin online](#)

Dear Hannah ,

Hope this November edition of the JSNA Bulletin finds you well...

New for this edition are the new and refreshed [Housing evidence](#) [Crime and Disorder Summary Ward and Constituency reports](#) using Place Analytics and a host of local information on the 2015 Indices of Multiple Deprivation plus the usual mix of other local content with wider news of interest ...

With the next bulletin being January there will be in that edition a range of evidence for you to view that is being used to inform the Wirral Plan 2020, both strategy and plan processes.

Remember if you have anything new or past that others I'm sure will find interesting and inform their work then please let me share with the 1,500+ bulletin readers....

Kind regards as always

John

JSNA Programme Lead

[‘Bringing together housing and public health to enable better health and wellbeing’](#).

Cold weather plan (CWP) for England (October 2015) [here](#)

Includes plan and evidence summary on planning to protect health in cold weather. This plan is valid from October 2015 until further notice

Smoking cessation in pregnancy: a review of the challenge [here](#)

In a new review health organisations praise progress over the last few years in bringing rates down overall but argue much more must be done to tackle huge inequalities across the country. The report sets out recommendations for how a new Government strategy could nearly halve the current rate of smoking in pregnancy over the next five years. Access overview [here](#) and report [here](#)

Dementia Friendly Communities: sharing learning from Bradford and York [here](#)

As part of its [dementia support programme](#), the Joseph Rowntree Foundation (JRF) has published *How Can we make our cities dementia friendly: sharing the learning from Bradford and York*. This report identifies key messages from two independent evaluations of areas that are relatively advanced in their dementia friendly community (DFC) developments.

Five million people at high risk of developing Type 2 diabetes

Five million people in England have blood sugar levels indicating a high risk of developing Type 2 diabetes. The [report on non-diabetic hyperglycaemia](#), published by Public Health England on behalf of the [NHS Diabetes Prevention Programme \(NHS DPP\)](#), gives the most up to date estimate of how many people are at risk of developing the condition. The NHS DPP will support those on the point of developing the condition, by helping them lose weight and become more active.

Life Magazine – Edition 2 from Cheshire & Wirral Partnership NHS Foundation Trust [here](#)

Wirral Carers E-News Bulletin ... latest local news and information from WIRED [here](#)

Measuring mental wellbeing in children and young people [here](#)

This document outlines the importance of measuring mental wellbeing in children and young people. It is intended to provide guidance on the use of targeted, evidence driven intelligence and practical support to those wishing to develop local joint strategic needs assessments (JSNAs) and the evaluation of interventions which improve the mental wellbeing of children and young people

Other information you might find useful [here](#)

What explains the growth in 'never-worked' households? (Joseph Rowntree Foundation) [here](#)

The number of homes where no one has ever worked has doubled in little more than a decade. But is this a sign of growing 'welfare dependency' or the result of other factors? This report looks at the characteristics of 'never-worked' households and considers the possible reasons for the increase. It finds that most never-worked household are lone parent households and younger single people; there is little or no evidence of a problem of 'intergenerational worklessness'.
